PAGE

OVERVIEW

The main page of the application, this is where all your current tasks will be displayed. The radio buttons at the top select whether selecting a checkbox deletes the task or marks it complete.

Welcome message says "Welcome back" if you're a returning user and "Welcome to photogrudo" if you're a new user

Completed tasks are moved to the Done column.

Tasks due within 24 hours will appear at the top of the screen under the welcome message.

The screenshot shows a 'Add a task' page with a sidebar on the left containing 'Hello There', 'Overview', 'Add a task' (which is selected), 'Statistics', and 'Content Tracker'. The main area has a title 'Add a task' and a message 'You currently have 3 priority and 0 do soon tasks'. It features an 'Enter Task' input field, a question 'What type of task is this?', and two radio button options: 'Do now' (unchecked) and 'Do soon' (unchecked). Below that is a question 'Is this task due?' with three radio button options: 'Task is due' (checked), 'Task is not due' (unchecked), and another 'Task is due' option (unchecked). A date input field shows '2023/03/09'. At the bottom is a large input field with placeholder text 'Type the name of your task and select the type of task you want to add'. The footer says 'Made with Streamlit'.

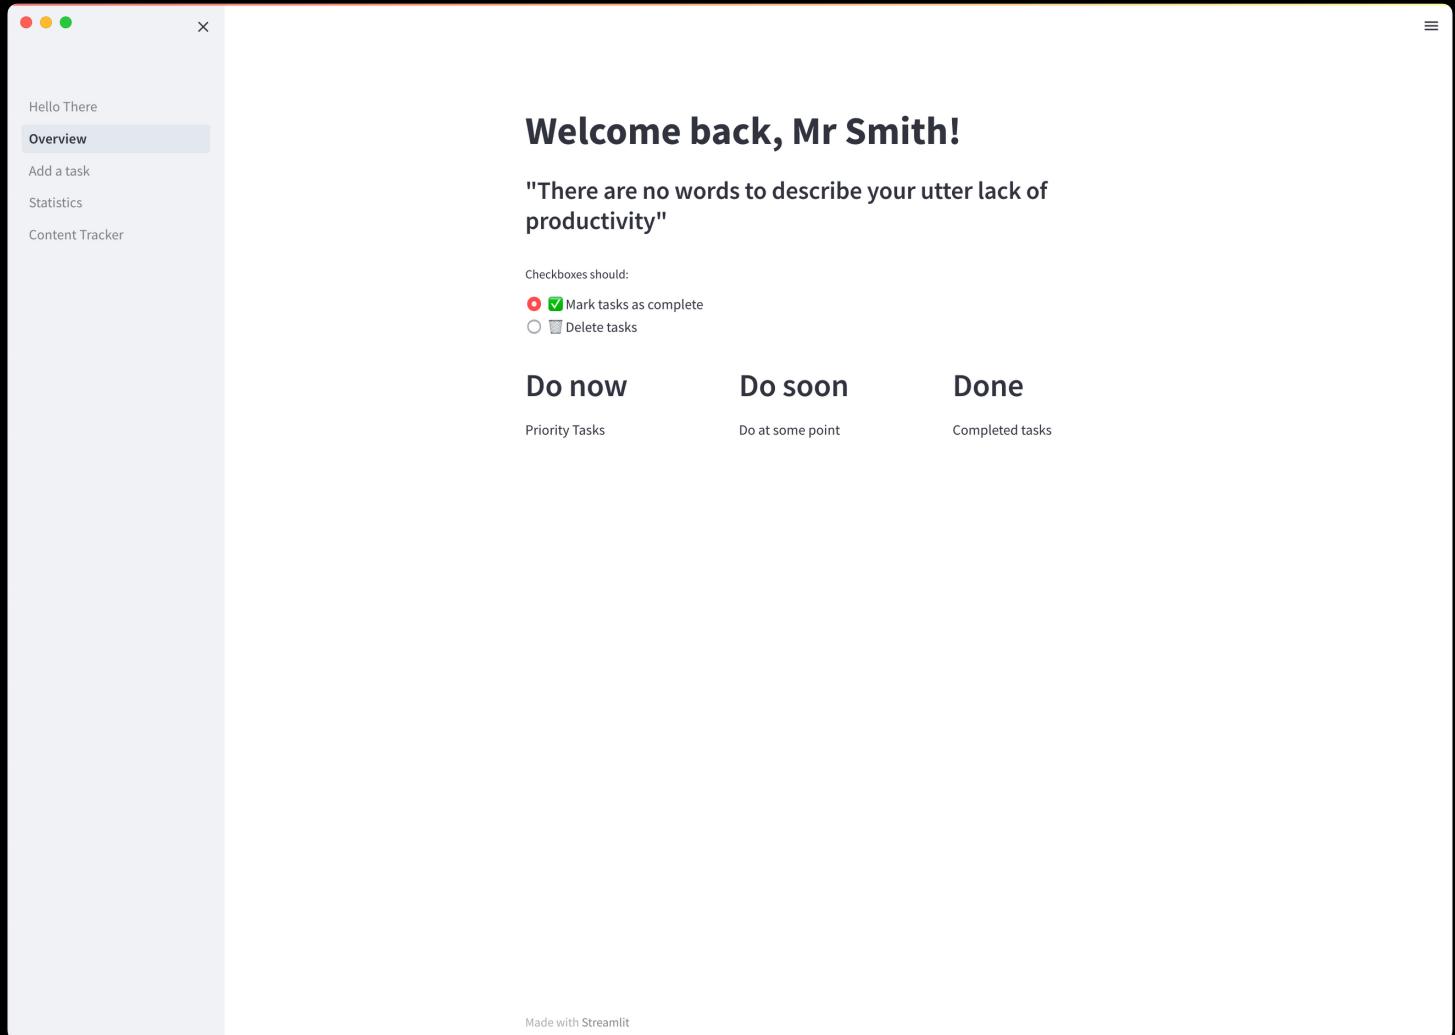

PAGE

ADD A TASK

The add task page is where users will add tasks to their to do list, with the choice of whether it is a do now (priority) task or a do soon task (general) and whether a due date is required or not. You can set your due dates up to a week in the past if you're feeling exceedingly honest.

These tasks will appear on the overview page.

The section of the overview page the task appears in will depend on the options chosen by the user when adding the task.

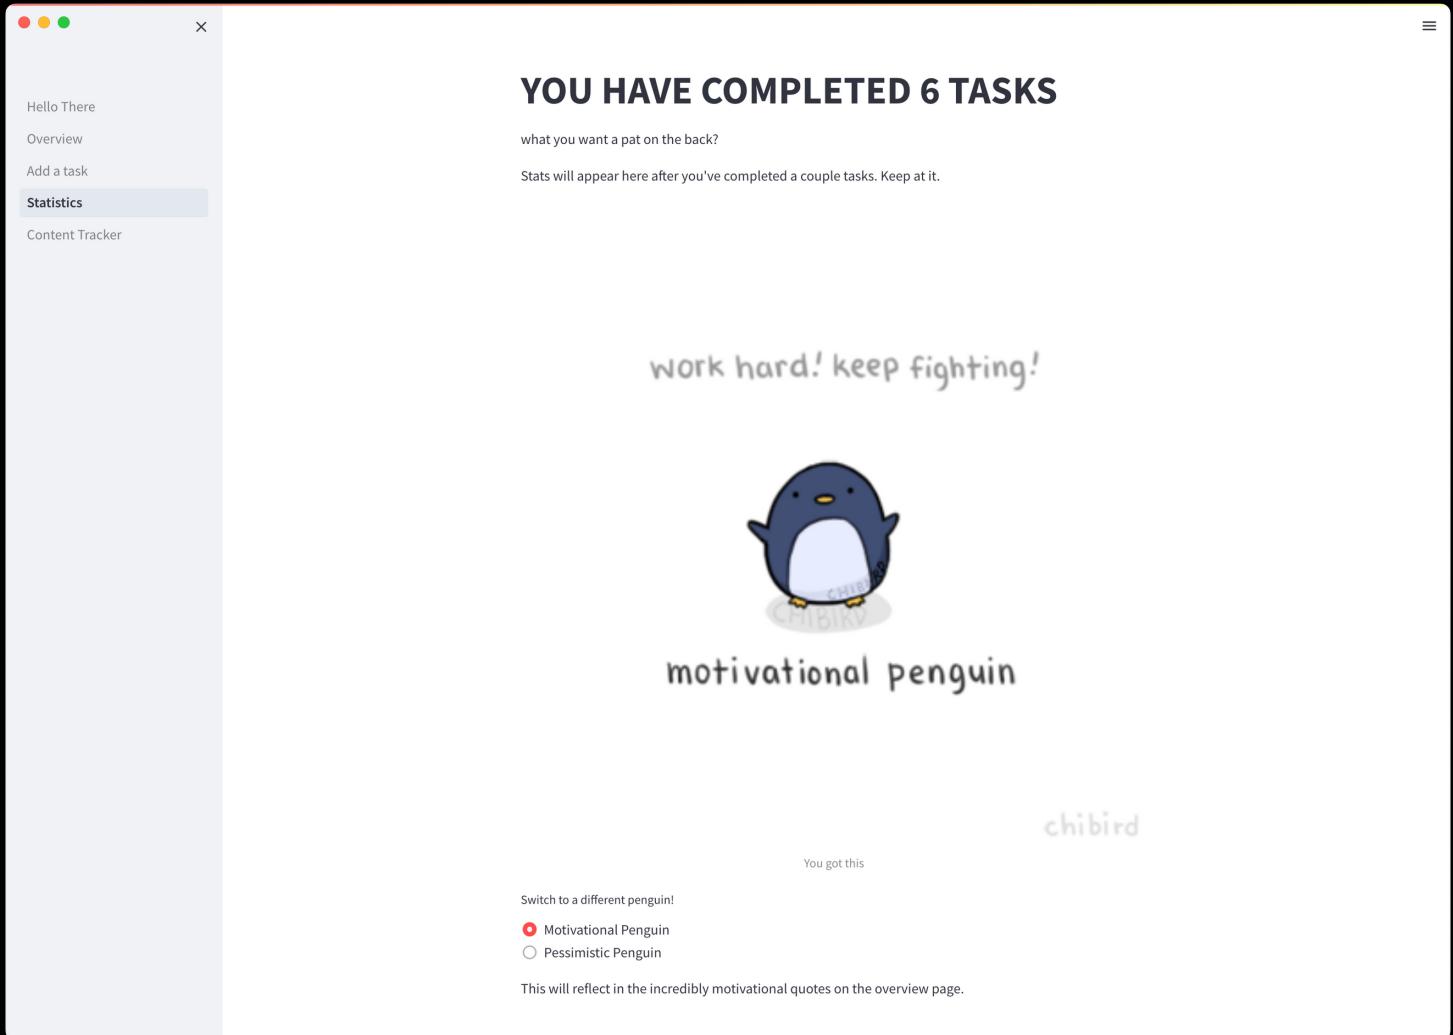

FEATURE

QUOTES

Depending on the penguin selected on the statistics page, the quotes displayed under the welcome message one the overview page will either be a quote from a collection of negative quotes or positive quotes.

Each set has 10 quotes that are picked with a pseudorandom number generator.

FEATURE PENGUIN

The statistics page shows a gif of a penguin, set by default to motivational penguin, if the user chooses to do so, they can change the default penguin to pessimistic penguin, this choice is remembered and will be reflected upon their next login.

Additionally, this selector will determine whether the quotes displayed on the overview screen are negative motivation or positive motivation.

The screenshot shows a Mac OS X-style window titled "YOU HAVE COMPLETED 10 TASKS". On the left sidebar, under the "Statistics" tab, there's a message "Hello There" and links for "Overview", "Add a task", "Statistics", and "Content Tracker". The main content area displays the following statistics:

- Average time taken to complete tasks:** On average, you take 1 minute(s) to complete a task.
- Overdue/On time task ratio:** On average, you complete 0.25 tasks after the due date per task completed on time. 20% of tasks are overdue on completion.

A dropdown menu at the bottom says "All completed tasks". Below this, there's a section titled "you can't do it" featuring a cartoon penguin. The penguin is dark grey with a white belly and a small tuft of hair. The text "Pessimistic Penguin" is written below the penguin. A note says "You don't got this". At the bottom, there's a link to "Switch to a different penguin!" with options for "Motivational Penguin" (radio button) and "Pessimistic Penguin" (radio button, selected). A note states: "This will reflect in the incredibly motivational quotes on the overview page."

PAGE STATISTICS

If there are more than 10 total completed tasks, a statistics page will show with stats about completed tasks (average time to complete tasks, overdue to on time ratio).

As an adaptation of the kill to death ratio in video games, the od/ot ratio encourages competition between friends using Photogrudo.

A list of all completed tasks is also available at the bottom of the page and the aforementioned penguin.

The screenshot shows a user interface titled "The photogrudo content tracker". On the left, a sidebar lists "Hello There", "Overview", "Add a task", "Statistics", and "Content Tracker", with "Content Tracker" being the active tab. The main content area displays a course titled "Software Design and Development (Superior Subject)". Below the title is a section titled "Topics" which lists five items: "Defining and Understanding the Problem", "Planning and Designing Software Solutions", "Implementation of Software Solutions", "Testing and Evaluating of Software Solutions", and "Maintaining Software Solutions". Each topic has a horizontal slider with a red dot indicating progress. The first four topics have a yellow star icon above the slider, while the fifth one has four yellow stars. Below the topics is a message: "Congratulations, you're more than halfway there". At the bottom of the main content area are three dropdown menus: "Add to the planner", "Remove items from the planner", and "Instructions".

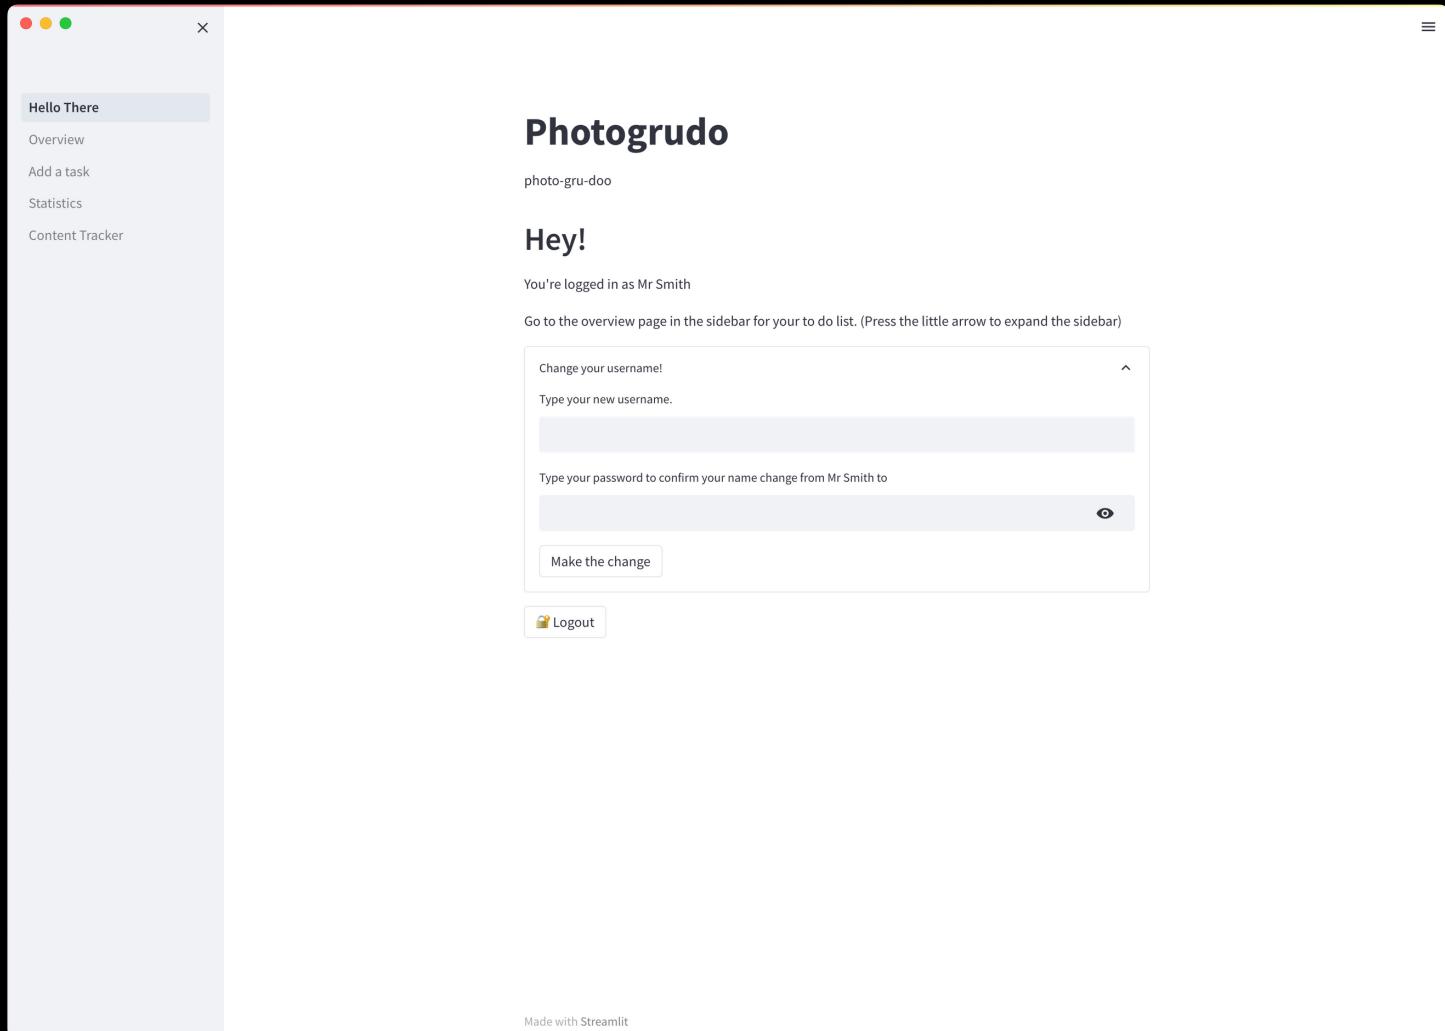

PAGE CONTENT TRACKER

Users can enter subjects and topics for each subject to track progression in their understanding as time progresses to keep an aerial view on their academic life. Instructions are provided on screen for first time users.

Users are presented with an intuitive star system which can then be used to display a qualitative measure of understanding in a subject. If you're honest with yourself of course.

Information entered into the content tracker will remain in the content tracker and will reappear with sliders in the appropriate places on the next login.

Users can also add or remove subjects retrospectively in the content planner depending on changing needs for more or less content tracking goodness.

FEATURE **USER IDENTIFICATION**

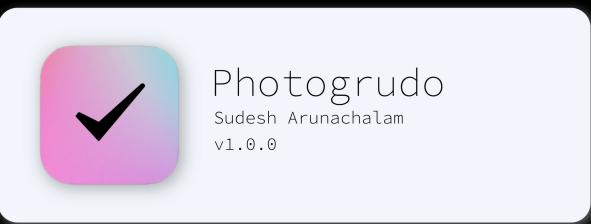

Multiple users are able to use photogrudo with a familiar login interface.

Users are also able to change their username if desired.

The name will be displayed across the program to give it a personal touch. E.g. The username is displayed on the overview page as a welcome message.

Intended for expansion into a cloud based productivity application but currently enables users of photogrudo to share the app installed locally on their computer with friends or family.
